Technology for Vacuum Systems

Professional aspiration of liquids

With the benefit of safe collecting and disposing of the aspirated media to a large autoclavable collection bottle. For continuous working a fast and safe system for exchanging and transporting the collection bottle is important. The VacuuTransContainer is completely designed for these purposes and is even better now with this offer for a FREE second collection bottle.

Additional 4 l collection bottle

With a sizeable 4 l capacity and made from shatterproof autoclavable polypropylene complete with hydrophobic filter 0.2 μ and self-closing quick-coupling, the collection bottle offers the optimal solution for safe and mobile vacuum handling. The specially designed bottle head minimizes aerosol formation in the bottle for extended filter life. Also the system uniquely allows for the addition of a second hand control for dual user operation.

- automatic vacuum control - without need for hand or foot switch
- self-sealing coupling for secure transportation
- powerful pump – ability to add a second hand control
- VARIO - variable suction power for delicate media
- additional collecting bottle for faster, safer operation

BioChem-VacuuCenter		BVC 21 NT	BVC 21 NT VARIO

Please quote offer "BVC 21-2009" with your order to receive the 2nd collecting bottle free of charge

Features BioChem VacuuCenter BVC 21 NT:

Automatically regulated pressure with chemistry diaphragm vacuum pump ME 2C complete with exhaust condensate separator (PP), VacuuHandControl (VHC), VacuuTransContainer (2 x VTC), quick coupling connector and plug, mains cable and manual.

Features of BioChem VacuuCenter BVC 21 NT VARIO:

As above, except with stepless variable vacuum operation.

Twice the benefit / half the cost

Optional bonus: Due to the powerful integral chemistry diaphragm pump it is possible to add a second VacuuHandControl (VHC) with quick coupling connector to the BVC 21 which converts it into a very economical two user system.
